Innovation in and out of parlour

MicroMarque4 Control System

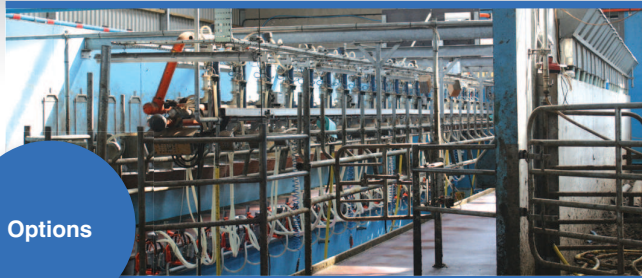

The MicroMarque4 is a simple and easy to use PC based control system with can be connected to a wide range of optional extras including parlour feeders, parlour auto-id, automatic drafting gates, milk meters and Cowculator dairy animal management software.

It can be used on herringbone or rotary parlours for cows, sheep and goats.

Innovation in and out of parlour

Options

- Feeding and non-feeding versions available
- Store milk yields using the ATL milk meter
- Full feeding system features available for cows only
- Automatically feed and store milk yields without keypad cow number entry using auto-id
- Automatically sort cows only using the Pegasus drafting system
- Connect live to Cowculator dairy animal management software to manage your cows, perform feed to yield and select cows for drafting from the comfort of your farm office

Milking Features

- 2 or 3 milkings per day
- Connects to ATL milk meters for milk yield storage
- Production rates for individual animals
- Milking time (spot slow milkers)
- Low yield attention at end of milking
- Full calendar integration to the parlour, display calendar based warnings on the milk meters

General Features

- Memory can store up to unlimited number of animals
- 4 digit alphanumeric animal numbers
- Health attentions available– AI, vet, individual mastitis quarters, 3 quarter cow (individual flag for each quarter), test milk, hold milk, hold antibiotic milk, high cell count, bulling and slow milker - optional animal already milked attention
- Customise health attentions on the milk meters
- Customise editable attentions on the milk meters, only display the ones the farmer wants
- Feeding and milking prevention on health attentions
- Optional voicing of attentions over loudspeaker

Pegasus and Cowculator Features

Pegasus Drafting System Features

- 4 dedicated sorting flags allow sorting by date and once only
- Quick sort flag with 3 ways to clear (after sorting, when the parlour is put into wash mode, manually by the user)
- Manual control of the drafting gate, lock the gate into any position and ignore cow tags

Cowculator Additional Features

- Manage your animals using feed and yield history over multiple lactations
- No upload or download of data to ATL Cowculator as all data is live
- Monitor animals health and medicine use
- Feed to yield and feeding based on days in milk
