# Micro Wash Control

Got the **ATL** Micro Milk Meter System? Want to put your parlour into wash or milking mode at the touch of a button instead of having to do it for each milk meter? The Micro Wash Control is the answer.

Easy to Use

Can Be Used On Stand-Alone or Fully Integrated Micro Milk Meter Systems

Put Parlour Into Wash, Milking or Idle Modes at the Touch of a Button

Comes With Easy to Install, Plug and Play Wiring Kit

## MICRO WASH CONTROL

# The Micro Wash Control

## Wash Control Features

### Easy To Use Control Unit

The Micro Wash Control is very user friendly with the minimum of key presses required to change the mode of the Micro Milk Meter System.

### Clear, Large Character LCD Display

The clear, large character LCD display is easy to read from a distance and under most artificial lighting conditions.

### Simple Six Button Keypad

All the functionality of the Wash Control is controlled by a simple six button keypad.

### Three Mode Functions Available

- Idle Mode** - This mode turns the power off to all the solenoids and should be used when the Micro Milk Meter System is not in use (stand-by).
- Milking Mode** - This mode powers the ACR ram, lifting the clusters ready for milking.
- Wash Mode** - This mode puts all control units into wash mode and washes the milk meters for a user set time (1-300 minutes).
